The group show features gallery's artists and brings together 32 artworks, paintings, sculptures and installations.

Desire is the driving force behind both the artwork and its viewer, with all its fascinations and limitations.

The artists summoned for this exhibition have in common, despite the diversity of their respective research and the variety of their outcomes, a common attitude: an epic attention to the form.

Wings of Desire is an ambitious show, both conceptually and visually, it combines fantasy, research and aesthetics, without shortchanging any of these disparate elements.
